

Tissue-Paper Rainbow

Instructions

1. Use the pattern to cut the plastic page protector into the shape of a rainbow.
2. Cut tissue paper into 1/2-inch squares.
3. Open the plastic sleeve (which should now be a doughnut shape). Glue rows of the tissue-paper squares to one half of the plastic sheet. Start with a row of purple, followed by blue, green, yellow, orange, and red.
4. Put dabs of glue along the red tissue and fold the plastic back in place to make a rainbow.
5. Allow glue to dry. Hang in a window.

Place dashed line on fold side of page-protector. Cut along curved, solid lines. Do not cut dashed lines.

Place dashed line on fold side of page-protector. Cut along curved, solid lines. Do not cut dashed lines.
