- **In the News** – Whisky Raising Spirits and Renewables in Scotland
- **Events!**
- **Something Fun** – June is Great Outdoors Month!

ALUMNI SPOTLIGHT

Reid Coffman

2004 Campus Ecology Fellow

Ohio State University

Project: Reid constructed an experimental green roof to simulate environmental conditions and evaluate the ecological and economic costs and benefits of different green roof and terrestrial ecosystems. Reid's Fellowship provided an initial information on the functioning of green roofs for Ohio State. Currently, the university is expanding its research and teaching roof garden with the campus's Chadwich Arboretum.

What he's doing now: Reid earned his Ph.D. in urban ecology at Ohio State and is now an assistant professor of landscape architecture at the University of Oklahoma where he teaches how landscape can be designed to provide ecosystem services within urban environments. In addition, he researches the application of sites-based strategies such as green roofs and rain gardens.

Edyon her Fellowship: *NWF's Campus Ecology Fellowship is a superior experience. Not only [did] is support the crucial first-stage research needed to initiate campus green roof technology, but it continues to offer exposure to a network of like-minded Fellows. I continue to maintain close contact with several Fellows from my class.*

What are YOU up to? We love to hear all of the exciting and inspiring things NWF alumni are investing their time in. Let us know (campus@nwf.org) and you could be featured in the "Alumni Spotlight."

JOBS/OPPORTUNITIES

Writer, Green Education Foundation (GEF)

Green Education Foundation (GEF) is seeking experienced and talented writers to complete the online text for a national 11th/12th grade course on green building.

Responsibilities:

- Write content for virtual text, which integrates a focus on green building and is aligned with the USGBC guidelines. GEF is currently seeking writers who have the knowledge and expertise to focus on the following areas:
 - Introduction to Sustainability
 - Indoor Environmental Quality
 - Revise and edit previously developed content to meet standards outlined by project manager
- Qualifications:
- Knowledge and background in LEED certification process
 - Excellent writing and editing skills
 - Ability to write for a high school audience
 - Strong background in environmental science and related concepts preferred
 - Experience with curriculum development and/or writing educational resource materials preferred
- Compensation: Commensurate with experience

More Information:

Send cover letter, resume and writing samples to service@greeneducationfoundation.org. Please write "Green Building Writer" in the subject heading.

Sustainability Coordinator, Colorado State University

Fort Collins, CO

The Sustainability Coordinator is responsible for providing project management for sustainability initiatives within Housing & Dining Services. The Sustainability Coordinator is responsible for working collaboratively with other HDS staff to integrate sustainable practices into construction, maintenance, purchasing, dining, student housing, and custodial procedures within the department and in collaboration with campus and community partners. This hands-on position will also actively engage residential students in sustainability programs and initiatives.

More Information:

Submit cover letter and resume, as well as names, addresses, and telephone numbers of three references. Applications must be submitted electronically (in Word or PDF format) to lori.vanagunas@colostate.edu. For full consideration materials must be submitted by **5:00 p.m. MST on Monday, June 27, 2011**. Applications will be accepted until the position is filled. If you have questions about the position or search process please contact Mandy Hagedorn at mandy.hagedorn@colostate.edu or (970) 491-3760.

Principals, Rocky Mountain Institute

Snowmass, CO

- Rocky Mountain Institute is seeking a candidate for a Principal role with a strong interest and experience in the **electricity system** of the United States. Our electricity program is focused on catalyzing a vast reduction in the use of fossil fuels while at the same time increasing the security and robustness of the system. This job involves working with senior colleagues to co-lead RMI efforts in this area, most of them within an initiative we call NGU – Next Generation Utility.
- Rocky Mountain Institute is seeking a candidate for a Principal role with a strong interest and experience in the **industrial system** of the United States. Our industrial program centers on innovative, integrative design of facilities and processes and, in some cases, products (such as cars and appliances). This role involves providing active leadership for much of our industrial projects work, and helping Program Directors shape and direct it.

TAKE ACTION

Help Protect People and Wildlife from Mercury Poisoning

Every year, coal-fired plants emit thousands of tons of hazardous air pollution that pose significant and numerous health and environmental risks. **Even in small amounts these extremely harmful air pollutants are linked to significant health problems** such as cancer, heart disease, neurological damage, birth defects, asthma attacks and even premature death.

The worst part of all is that these pollutants have never before been limited, until now. The Environmental Protection Agency recently proposed new standards that would limit up to 90% of harmful emissions by requiring power plants to install widely available, proven pollution control technologies.

Polluters are fighting this! We need your help generating record breaking numbers of comments of support before the July 5th deadline.

Send your comments directly to the EPA using this simple [change.org petition!](#)

IN THE NEWS

Whisky Raising Spirits and Renewables in Scotland

Whiskey can help fuel your spirits and help fuel a country. Draff, by-products of used grains and pot ale from the whisky distillery process, will be used to generate electricity for a new power plant in Scotland. The plant will be connected to the national grid and is expected to generate enough renewable energy from biomass to power 9,000 homes, cut over 46,000 tones of CO₂ emissions, and create a number of jobs. Left over pot ale syrup will also be used for animal feed and fertilizer. The power plant, which is located in the heart of Whisky Country, should be up and running by 2013.

- Mekell Mikell, NWF

EVENTS

Outdoor Nation Summer Summits... The Revolution Continues!

What

The Youth Summit is a 3-day event with 249 of your peers (give or take) so that we can find solutions to the challenges that are keeping people indoors. And, work with us on a project that you help design.

Who

YOU! You can be a summit delegate if:

- You really want to change the world so that everyone has the chance to GTFO
- You are between the ages of 18* and 28
- Your application is chosen by our esteemed committee

* If you are under 18, consider yourself exceptionally mature and will hold your breath until we let you apply, email Ivan Levin directly at ILevin@outdoornation.org.

Why

Because the best person to make a change for this generation is *YOU*... and we finally have our own program, the power to set our own agenda and *WE CAN* make things happen with your help.

Where/When

NYC - June 24-26

Atlanta - July 8–10

Minneapolis - July 15–17

Denver - July 22–24

San Francisco - July 29–31

More Information:

<http://www.outdoornation.org/page/summits-2>

Great American Backyard Campout

June 25, 2011

On June 25th, thousands of people across the nation will gather in their backyards, neighborhoods, communities and parks to take part in a one-night event all about re-connecting with nature.

More Information:

www.backyardcampout.org/

SOMETHING FUN

June is Great Outdoors Month! (As if you needed an excuse...)

President Obama has proclaimed June as Great Outdoors Month, along with almost every state governor. The Presidential Proclamation urges all Americans to spend time in the great outdoors and to uphold our nation's legacy of conserving our lands for future generations.

Here are some fun ways to celebrate the outdoors this June:

- June 1-25 – **Go Camping America promotion** – National Association of RV Parks and Campgrounds
- June 4 – **National Trails Day** – The American Hiking Society – America's 200,000 miles of trails provide access to the natural world for recreation, inspiration and education. In 2010 40 million Americans hiked and backpacked in the U.S.
- June 4-12 – **National Fishing and Boating Week** – Coordinated by the Recreational Boating and Fishing Foundation and coincides with most states' free fishing days.
- June 11-17 – **Great Outdoors Week** – everyone is encouraged to enjoy the outdoors, even if briefly, every day this week
- June 11 – **National Get Outdoors Day** – healthy, active outdoor fun available at sites across the nation
- June 11 – **Fee Waiver Day in National Forests** – Sponsored by the US Forest Service which operates 17,000 recreation sites and manages 193 million acres of public land.
- June 11 – **National Marina Day** – The Association of Marina Industries - showcases the fun and benefits of boating and the marina lifestyle
- June 21 – **Fee-Free Day in National Parks** – Fee-free days at more than 100 national parks that usually charge entrance fees. Many national park concessioners are welcoming visitors with their own special offers.

MORE JOBS & OPPORTUNITIES

- **Alumni Spotlight** – Scot Miller, 2006 Campus Ecology Fellow
- **Jobs and Opportunities!**
- **Take Action** – Help Advance the "Stop Asian Carp Act"
- **In the News** – *Cycling Duo Pedaling Over Two Continents on Bamboo Bikes For Fresh Water*
- **Events!**
- **Something Fun** – *Green Tips for a Cool Summer*

ALUMNI SPOTLIGHT

Scot Miller

2006 Campus Ecology Fellow

Harvard University

Project: Scot wrote "The Green Guide to Harvard," an educational resource on how to create a sustainable campus. The guide includes sustainable and energy efficient practices for dormitories, information on environmentally sustainable businesses in the area and listings of environmental and outdoor-related area events. Harvard continues its campus greening initiatives through four overarching commitments: a greenhouse gas-reduction goal of 30 percent from FY2006 levels by 2016 (including growth), a university-wide temperature policy implemented in 2009, sustainability principles and green building guidelines.

What he's doing now: After completing his undergraduate degree, Scot earned a master's degree at Trinity College Dublin where he started a new recycling and environmental volunteer program similar to those his peer NWF Fellows had worked on at their own universities. Scot recently began working on his Ph.D. in earth and planetary sciences at Harvard and hopes to continue being a campus activist. Currently he is using regional-scale atmospheric models to improve the understanding of greenhouse gas sources.

Scot on his Fellowship: *I had an incredible experience as an NWF Campus Ecology Fellow. NWF provided the support to help me make my campus environmental project a reality. Beyond the support from NWF, the Fellows were an amazing resource; their ideas have inspired my own campus activism beyond the Fellowship.*

What are YOU up to? We love to hear all of the exciting and inspiring things NWF alumni are investing their time in. Let us know (campus@nwf.org) and you could be featured in the "Alumni Spotlight."

JOBS/OPPORTUNITIES

*Associate VP, Operations and Sustainability, Berea College
Berea, KY*

Berea College, celebrated nationally as one of America's greenest colleges, is currently seeking to hire an experienced professional to work closely with the Vice President to provide leadership, inspiration, supervision and direction to a number of key areas across campus. These areas include Facilities Management, Environmental Health and Safety, Property Management, Print Shop, College Post Office, Conferences and Capital Project Management. The successful candidate will provide expertise and energy to advance the College's sustainability objectives and campus planning processes, and improve reporting and analysis of business and sustainability activities.

More Information:

An Application to Join the College Staff is required for consideration for this position as is a detailed letter of interest. Qualified applicants may obtain an application either through the Office of People Services, Suite 100, Fairchild Hall on the campus, or by downloading the application on line at www.berea.edu/hr.

**Program Manager, Environment and Resources, Stanford University
Stanford, CA**

Stanford University's (CA) Emmet Interdisciplinary Program in Environment and Resources (E-IPER) seeks a program manager. The manager has primary responsibility for the development and management of the Joint Masters of Science in Environment and Resources component of E-IPER. Other responsibilities will include teaching and leading students through capstone projects, curriculum development, student advising and professional development. The successful candidate should have a master's degree in a related field and five to seven years of experience in program coordination.

TAKE ACTION

Help Advance the "Stop Asian Carp Act"

The Great Lakes are home to native fish species including walleye, lake trout and perch--species that are valued by anglers and important to the Great Lakes ecosystem. But, **Asian carp are on the verge of invading** the Great Lakes and **native fish may not stand a chance.**

Incredibly, the U.S. Corps of Engineers plans on waiting an entire **5 years before taking action** to develop permanent barriers to stop Asian carp! By then, **the Great Lakes could become forever infested with the invasive species.** The "Stop Asian Carp Act" currently in Congress would force the Corps to quickly take action to stop Asian carp, but the bill **needs more support** before it can advance to a vote.

Take Action! [CLICK HERE](#) to protect the Great Lakes from an invasion of Asian carp by sending a message to your Member of Congress today, urging them to advance the "Stop Asian Carp Act."

Green Tips for a Cool Summer

A green guide for keeping your home cool this summer, from simple steps to bigger projects.

**Taken from WebMD*

Keeping our houses cool with air conditioners costs Americans about \$11 billion a year. And those air conditioners release about 100 million tons of carbon dioxide into the air annually -- two tons for each home that has one.

With the demand for home air-conditioning systems in the U.S. at an all-time high, summer's toll on the environment is probably going to get worse.

The good news is that by following some green tips at home this summer, you can cool off, save money, *and* make a sizable dent in your carbon footprint.

Office Manager, Earth Sangha

Fairfax, VA

Earth Sangha, a small environmental nonprofit based in Fairfax County, is looking for an Office Manager. The Earth Sangha runs an ecological restoration program for public lands in northern Virginia. Our local program includes the largest local-ecotype native plant nursery in the greater DC area. We also run the Tree Bank / Hispaniola, an agroforestry program for farmers living along the Dominican Republic – Haiti border. More information on the Earth Sangha is available on our website: <http://www.earthsangha.org/>

We're looking for someone to maintain our books, databases, and files; write reports to our public agency partners; help with grant proposals and reports; manage a large correspondence; write for our newsletter and website; and help with all the miscellaneous chores necessary to make an office work. Candidates should be comfortable writing to deadline, have a strong interest in conservation, be at least slightly obsessive about details, and be able to learn new computing skills quickly. (We're an all-Mac office; the Office Manager will run the most recent versions of QuickBooks, Filemaker Pro, and Open Office, among other programs.) Some understanding of local natural areas would be helpful. Access to a car is a must. This is a permanent, full-time position with significant potential for growth. Salary is ca. \$20k to start, plus a modest benefit package. Informal and usually cheerful work environment. EOE.

More Information:

Applicants should send a resume and cover letter to cbright@earthsangha.org

Look for the next Young Professionals Listserv issue coming in August.

To unsubscribe to this listserv please email campus@nwf.org and list "unsubscribe to YP list" in the subject line.

We're happy to present the **August 2011 issue** of NWF's Young Professionals Listserv. Please use this listserv to share your own initiatives, pose questions and network by simply emailing youngprofessionals@lists.nationalwildlife.org.

- **Jobs and Opportunities!**
- **Take Action** – Stop Hard Rock Mines from Poisoning Grizzlies
- **In the News** – *Pedaling Your Way to Environmental Nirvana*
- **Events!**
- **Something Fun** – Treehugger's "8 Favorite, Crazy, Cool and Bizarre Shark Stories"

ALUMNI SPOTLIGHT

Daniel Weisshaar

2009 Global Warming Policy Intern

Project: As a Global Warming Policy Intern, Daniel assisted with the daily operations of the Global Warming Policy Team during the passing of the American Clean Energy and Security Act (H.R. 2454). Daniel collaborated with DC NWF staff in organizing numerous NWF fly-ins so that community leaders from all walks of life from every region in the country could visit their Members of Congress in Washington DC and advocate for Clean, Green, and Fair climate legislation. Daniel was also responsible for assisting with policy analysis, scheduling congressional meetings and coordinating the assembly of information packs for congressional staff and NWF members. Daniel also took on the task of charting the predicted economic impacts of H.R. 2454.

What he's doing now: After completing his internship, Daniel has focused his efforts in fighting air pollution in the District of Columbia and working with communities facing disparities. Along with educating local decision makers on new clean technologies, Daniel serves on the Board of Directors for the Metro Washington Council of Government's Clean Air Council, where he brings his experience in conservation and human health to the table. Daniel was also recently selected as a NWF Young Leader Delegate during the 2011 Young Leaders Assembly and currently serves on the NWF Mid-Atlantic regional advisory committee.

Daniel on his Internship: *I had an opportunity to see firsthand how coalitions of broad groups and interests are forged and kept together during one of the most active and exciting environmental trench wars in recent years. Even though the bill never made it to the Senate floor I learned the importance of having friends and allies from broad groups at your side. Beyond the support from NWF staff, I was able to meet and learn from amazing people who have dedicated their lives to conservation and environmental justice, and I will take that experience with me wherever I go.*

What are YOU up to? We love to hear all of the exciting and inspiring things NWF alumni are investing their time in. Let us know (campus@nwf.org) and you could be featured in the "Alumni Spotlight."

TAKE ACTION

Stop Hard Rock Mines from Poisoning Grizzlies

Right now, grizzly bears of Bristol Bay, Alaska are at risk from the toxic pollution of hard rock mining. The Pebble copper and gold mine, proposed for the pure headwaters of Bristol Bay, would produce **billions of tons of toxic mine waste** which will likely find a way into local waters--**poisoning salmon and the grizzlies** that depend on them.

For years, large mining corporations have used two loopholes in the Clean Water Act to dump massive amounts of toxic waste into America's most pristine rivers, lakes, and wetlands -- devastating watersheds and the wildlife that depend on them.

But with a simple rule change, the Environmental Protection Agency and Army Corps of Engineers can **close these loopholes and stop Big Mining** from using our waters as industrial waste dumps.

Click [HERE](#) to send a letter urging the White House, Environmental Protection Agency and the U.S. Army Corps of Engineers to close these mining loopholes to protect our nation's waters and wildlife.

IN THE NEWS

Pedaling Your Way to Environmental Nirvana

A recent post on the New York Times Green blog details how cyclists are generating electricity on spin bikes at a New York Sports Club in Chelsea.

Just over a year ago, the club fitted a full line of Star Trac Spinner NXT cycles at this Chelsea location with generators designed to convert human energy into electricity. Since then, nationwide sales of the devices have doubled, according to Mike Curnyn, chief strategy and marketing officer at Green Revolution, their designer and manufacturer. Currently installed in 75 fitness centers across the United States, the retrofitted technology is also to be introduced in Europe later this year.
