

Climate Change Sample Action Plan

What is the issue?	What action will we take?	Who will do it?	When will it be done?	How will we monitor progress?	How will we know if we succeeded?	What will it cost?
Need to know our school's current impact	Calculate school carbon footprint	Eco-Action Team and other interested students	By end of October	Recalculate each year to see changes	Our carbon footprint decreases	Nothing
Need to raise awareness about climate change in school community	Hold climate change education and awareness fair	Eco-Action Team coordinates, whole school involved	November	Student and parent survey	Over 50% of the student body attends and we get 30% of surveys back	\$500 for food, beverages and marketing (find a sponsor?)
All our energy comes from fossil fuels	Explore alternative energy sources for school	Energy sub-committee of Eco-Action Team	Ongoing	Produce fact sheet on alternatives, survey school community	We implement an alternative energy source	No cost for exploration, implementing depends on energy source
We want more information and recognition for our program	Find out if we can become an Energy Star School: present idea and info to administration	Energy sub-committee of Eco-Action Team	January	Feedback from administration	We become an Energy Star school	Depends on what we need to add or enhance to qualify for the program

Prepared by the National Wildlife Federation as part of the Climate Change Pathway of the Eco-Schools USA program
