

About the Authors

Mary McIntosh, PhD, is vice president of Princeton Survey Research Associates (PSRA) and director of its Washington Office. She is a specialist in social policy and international research. With more than 20 years of experience conducting social and policy research, Dr. McIntosh has won international recognition for her groundbreaking surveys in post-communist societies. She has taught statistics and research methods courses for Boston University, the University of Maryland and the Dallas Health Science Center. She has published extensively on European and American society and politics and is a frequent speaker at international and national conferences.

Kathy Cacciola is a coordinator of the Campus Ecology Program at the National Wildlife Federation (NWF) where she manages fellowships, organizes stakeholder meetings, conducts training clinics, and co-coordinates the State of the Campus Environment project. Before joining the staff of the NWF, she was a development assistant at American Rivers. During the summer of 1998, Ms. Cacciola worked at the Kenai National Wildlife Refuge in South-central Alaska as a resource assistant through the Student Conservation Association, conducting campfire and nature walk interpretive programs. She graduated from American University in May of 1997, with a BA in Environmental Policy/International Development. As a student she studied abroad in Denmark and Kenya. Ms. Cacciola has also worked with Discovery Creek, the Agri-Energy Roundtable and Greenpeace.

Stephen Clermont is assistant project director in PSRA's Washington office and has spent nearly a decade working on hundreds of survey research projects with a particular focus on the American political environment. A graduate of the University of California at Berkeley, Mr. Clermont has polled extensively in the last four U.S. elections as well as for many public interest groups focusing on trade, health care, and women's rights.

Julian Keniry manages the National Wildlife Federation's Campus Ecology Program. Helping to launch the initiative in 1989, Ms. Keniry has spoken to a wide variety of audiences all across the country and beyond about issues of environmental stewardship and sustainability in higher education. She wrote *Ecodemia*, and co-authored *Green Investment, Green Return: How Practical Conservation Projects Save Millions on America's Campuses*. Her most recent work, *Campus Environmental Management Systems*, is a guide to strengthening and sustaining campus ecology initiatives. She serves on the Board of the Institute for Conservation Leadership, graduated from Agnes Scott College with degrees in international relations and German, and is completing her Master's degree in Environmental Science and Policy at Johns Hopkins University.
