

## Instructions for Accessing the Forestry CPR Online Training Course

Wildlife University is an on-line portal that houses the National Wildlife Federation's educational training courses. It provides people with the opportunity to learn about wildlife and wild places and the issues that impact them.

1. Enter <http://wildlifeuniversity.nwf.org> into your browser.
2. Register using a user name and password. If you have already registered, please log in.
3. Looking at the left navigation, choose "Enroll." If you have already enrolled in a class and are coming back to complete a course, look again at the left navigation and choose, "Access Your Courses."
4. Here you will find all of our courses for all of our programming. **Scroll down to the Volunteer Opportunities section and click on Urban and Community Forest CPR.**
5. Once you "click" on **Urban and Community Forest CPR** it may seem as though nothing happened, but it did. You will now want to scroll back to the top of the page and again look to the left navigation. Click on "Access Your Courses."
6. Now you are ready to click on "Launch Course." This will take you to the course which will take roughly 90 minutes to complete.
7. You can save your work and come back to it later if you cannot complete course all at once. You can tell how much of the course is completed by the shading of the sun graphic.
