

WEBBY WONDERS

Some spiders make beautiful works of art when they spin their webs. Other spiders' webs are designed to be funnels or traps, and cobweb spiders make messy-looking webs. No matter what, webs are great tools for catching a meal. Take a look and see what kinds of webs you can spot.

Keep a record!

Date _____ Time _____

Helpful Things to Take Along:

- Magnifying glass
- Spray bottle of water
- Camera

In the boxes below, draw and describe some spider webs you find. You might want to spray the webs lightly with water. (The water drops will help you see the strands of the web better.) If there's a spider at home, draw and describe it, too!
