WIKIWATERSHED

STEP 3

Type in your city and state and zoom out to see at least a quarter of your state. Depending on the size of your states will determine how much to zoom in and out.

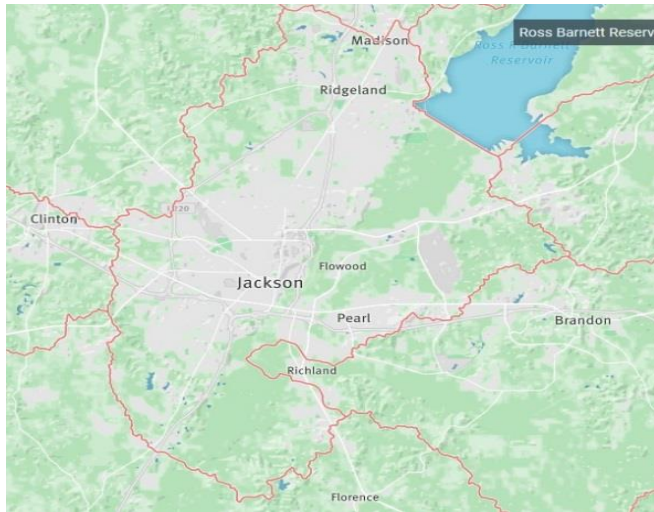

STEP 4

Open Select Boundary and choose from the dropdown, “USGS Watershed Unit (HUC-10)”.

WIKIWATERSHED

STEP 5

Zoom in or out so you can see your entire watershed on the screen. Hover your cursor within the boundaries of your watershed until you see the name of your watershed appear. Then click **ONE** time. Your analysis will begin.

STEP 6

Use the tabs across the analysis section of the screen to toggle between “land” and “soil”.
