

Attract Birds and Butterflies, Improve Water Quality, and Prepare for Climate Change

Sacred Grounds

WORKSHOP PART 2

Tools for Greening Your Congregation's Grounds

Attendance at the first workshop is not necessary to join us.

Answer the faith-based call
to environmental stewardship!

We invite Montgomery County congregations to explore in-depth how to beautify your congregation's grounds while reducing its environmental footprint. We'll hear from experts on how to:

- Create wildlife habitat at your congregation and certify as a Sacred Ground
- Reduce storm water runoff using native landscapes and other RainScapes techniques
- Transform lawns into life-supporting meadows
- Select, plant, and maintain native plants for your grounds
- Educate and inspire your congregation to green your grounds

Local vendors will also be present to share information on native plants, rain barrels, and other tools to help you get started!

Sunday, June 21st, 2:00pm – 5:00pm

Colesville United Methodist Church, 52 Randolph Rd, Silver Spring

**Please RSVP to Elizabeth Stevens at elizabeth@gwipl.org
and get a free topographic map of your congregation!**
