

BACKYARD PHOTO SHOOT

This month's photo contest winners (June 2008 Ranger Rick, page 4) all photographed "nearby nature." If you have a camera, why not take some photos right outside your door, too? It's a great way to look closer at nature. Photographers often take notes to help them remember what they saw, where, and what was interesting about the scene. Describe each photo you take below. Later, you can paste the photos into your Nature Notebook.
